AE-99 Recess Well Matting

**Durable and Stylish
 Safe, Effective and Attractive**

Aluminium Frame with fiber carpet matting, climate performance, outstanding look.

Recess Well Matting provides highly efficient matting for the central point of the entrance in shopping centres, airports, banks and other commercial buildings.

Matting delivers all advantages in one; assists extremely well to traffic, including trolley, cart and forklift traffic

captures perfectly fine and coarse dirt
 absorbs incoming water
 keeps a superior appearance under any conditions

Avoid slip hazards (Rubber Treadstrip)

Walked-in dirt and moisture can cause slip hazards in entrances with hard floors.

The Thermoplastic Rubber safety tread strip guarantees safe passage. The safety tread strip is elastic and encapsulates the sole of the shoe.

The rough surface gives optimum grip; the resistance to wear provides a prolonged life cycle.

The dirt will fall through the ribs inside the matwell
The dirt is kept from sight and gives the entrance a cared-for impression
The mat can be rolled up for cleaning

Prevents walked-in moisture

Moisture is the hidden soiler of floorcoverings beyond. On hard flooring, moisture can cause a serious and undersired slip hazard.

Polyamide BCF yarn textile tread strip (with coarse filament) stops moisture. Friction with the exclusively developed Noval Resist yarn results in removal and storage of moisture from soles of shoes.

The exclusive brushing and scraping yarns not only is it very effective at brushing off dirt and have a high moisture absorbing capacity, but it also releases the dirt much easier when cleaned. For colour selection, please contact your local distributor.

Property	Value
Total mat depth	22mm
Aluminium profile height	17mm
Aluminium wall thickness	1.8mm
Profile width	27mm
Space between 2 profiles	3mm

Prevents walked-in moisture

Coarse dirt increases the wear on floorcoverings beyond. Furthermore, soiling becomes noticeable more quickly because of the coarseness of dirt.

The unique construction guarantees a strong brush action, which removes sand, mud, clay and grit from the sole of the shoe.

As the brushes are firmly set into the aluminum base, an optimum life cycle and effectiveness are ensured.

The mat can be rolled up periodically for removing the dirt underneath.
